

GTV 70-2 scaled to 14 MHz by Rob, PE1ITR

Hi Hartmut,

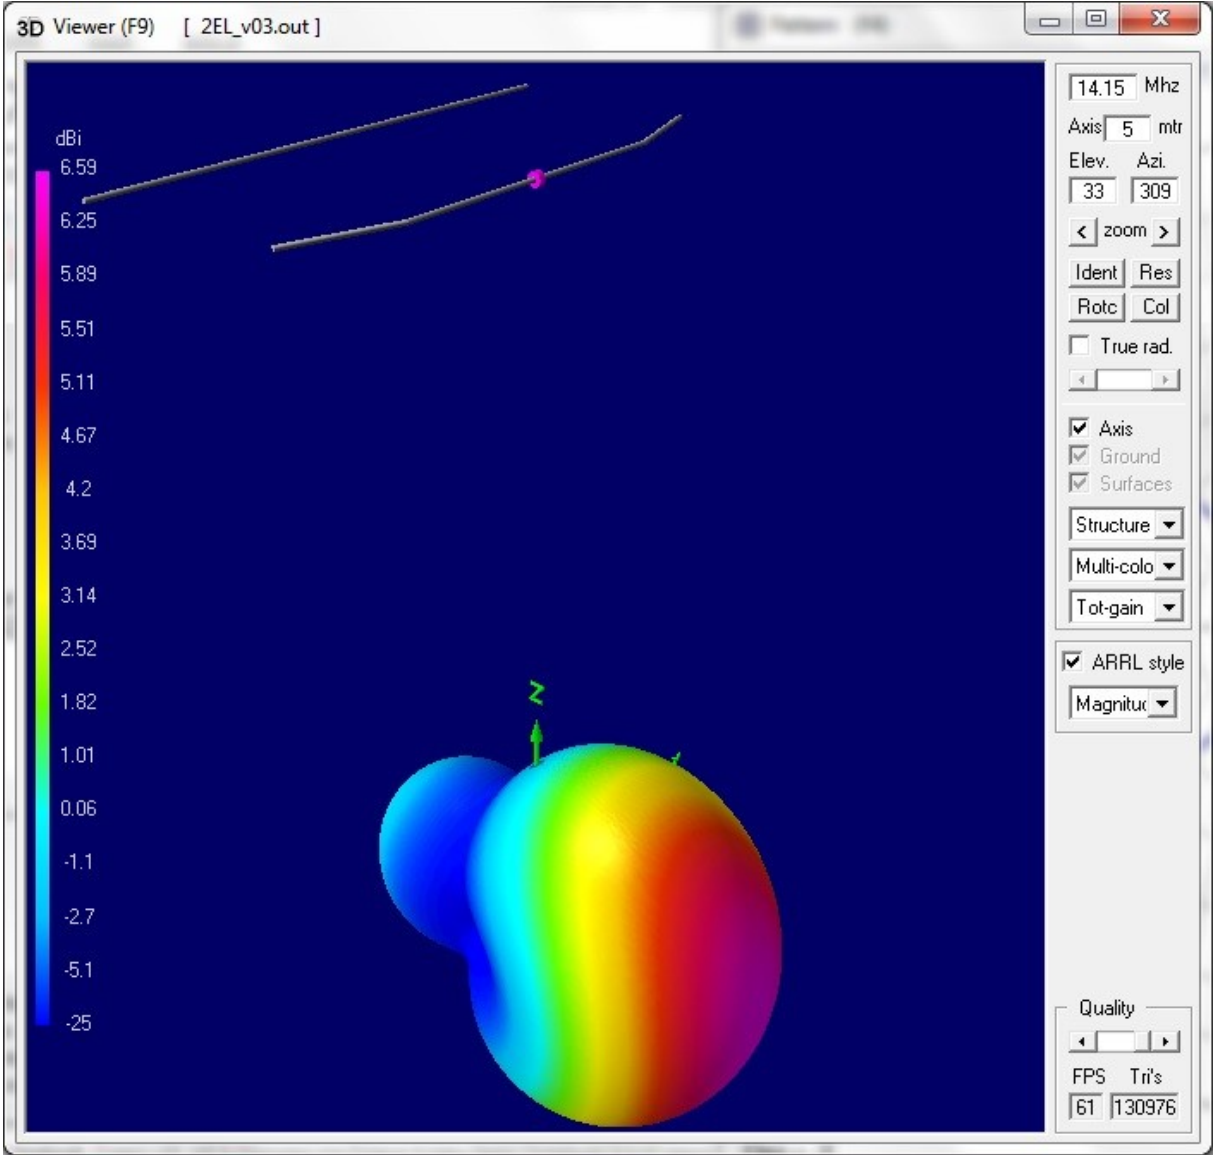

maybe you like this. Last weekend in de Dutch PACC contest I needed a 20m yagi but there was no available. So I rescaled your 2el 70cm Yagi design to 20m with some adjustments in NEC4 and used this one. This worked perfect ☺ SWR and Pattern as expected.

Rob's simulation in 4nec2

GTV 70-2 scaled to 14 MHz by Rob, PE1ITR

Simulated and measured VSWR

What a scale up. Thank you Rob for sharing this!
