

DG7YBN Certified Builder

I hereby declare

John Sygo, ZS6JON

a Certified Builder of VHF/UHF GTV Yagi antennas.

John Sygo has repeatedly shown the necessary skills to build and plot GTV Yagi antennas in a range of 50 to 432 MHz to high precision.

To become a DG7YBN Certified Builder the following objectives have to be fulfilled:

- Qualified measurement equipment is at hand.
- Understanding and application of Boom Corrections.
 - Skills in producing Symmetrising Members.
 - Good understanding of mechanics.
 - Ability to produce mechanical geometries with appropriate precision.
- Produce of at least 12 well built and measured GTV Yagis of various designs and frequencies.

This Certificate is valid for a period of two years.
Date of Expiration is 2022-06-20.

Renewal of the certification status is subject to demonstrating a continuous upholding of the required standards described above.

Kassel, 2020-06-20
